- GitHub

PROJECTS

Job Search Platform | MERN

- Developed a job search portal using Express.js and React.js, following MVC architecture.
- Ensured data security with encryption and access controls.
- Utilized MongoDB for efficient data storage and retrieval.
- Implemented user sessions and error handling for data integrity.
- Employed EJS for server-side templating and React.js for frontend interactivity.

E-Commerce Website | HTML, CSS, JavaScript

- Independently developed a responsive e-commerce platform using HTML, CSS, and JavaScript.
- Designed and implemented features like a dynamic image slider, sidebar navigation, and a "Today's Deals" Section.
- Ensured code modularity and cross-browser compatibility.
- Demonstrated strong problem-solving skills and attention to detail throughout the entire development process.
